A People United Can Beat Monopoly

The monopoly corporations which dominate our society, can only lead us further into economic crisis and social decay, into war and chaos.

The platform of Gus Hall, a founding organizer of the steel workers union, and Angela Davis, leading Black activist and scholar, shows the way to victory over monopoly capital — the fighting unity of the people.

In 1980, your vote for Hall and Davis is your most effective vote. It is a vote for a brighter future and not for the politics of the past.

You wouldn't vote for your boss as shop steward. Why vote for one of his stooges for President?

Don't waste your vote. Vote your own interests. Vote Hall and Davis!

Fed up?

. . . with old party politicians who serve big business?

Gus Hall and Angela Davis say:

Put People Before Profits

GUS HALL
for President

ANGELA DAVIS
for Vice President

Fed up?

. . . with being jobless?
. . . with skyrocketing food prices, rents and interest?
. . . with mounting racism and discrimination?
. . . with a government that lavishes $156-billion on the Pentagon — and cuts down on school lunch programs?

We're **all** fed up. We're being robbed blind by the big banks and monopoly corporations that control the economy, government and electoral machinery lock, stock and barrel.

These dollar patriots shut down factories in the U.S. — and open up where they can reap superprofits, be it Latin America, Asia or elsewhere. They wangle huge tax breaks. Many pay no federal taxes. They have but one god — maximum profit.

This gang spent tens of millions to nominate Ronald Reagan, Jimmy Carter — and John Anderson, the so-called independent who for 20 years voted against labor.

Reagan, Carter and Anderson give us sweet talk now, but their records show their hearts belong to corporate daddy. All three agree on "sacrifice" by the working people, and maximum profits for the corporations. They support bloated military budgets. They back policies that sharpen the danger of new Vietnams and a nuclear holocaust.

So don't agonize about which one is "the lesser evil." All three are stooges of Big Money.

There IS an alternative. Your vote can say it loud and clear: PUT PEOPLE BEFORE PROFITS. Vote for Gus Hall and Angela Davis, the Communist candidates for President and Vice President. (They'll be on the ballot as Independent in some states.)

Hall and Davis say it like it is — that the capitalist system breeds war, poverty and racism. They hold that only a socialist United States can **finally** eliminate these evils. But we don't have to wait for socialism to curb the monopolies **now.**

A great people's coalition can do it. Led by labor, allied with the Black and all other racially oppressed peoples and all other victims of monopoly — the women, youth, family farmers, small business and professional people — a people's coalition stemming from the grass-roots can:

- **Return our national policy to the road of detente and peace.**
- **Smash the Big Lie of "Soviet aggression" — the myth used to justify vast arms profits.**
- **Compel the monopolies to disgorge some of their obscene profits, provide jobs, and roll back prices and rents.**
- **Outlaw racist acts, the KKK and the Nazi party.**
- **Build the base for a mass anti-monopoly party that can effectively challenge old-party politics.**

On Nov. 4th, you DO have a choice. Use it to PUT PEOPLE BEFORE PROFITS:

A People's Program . . .

1. Ratify Salt II, End the Arms Race

Peace is crucial. A new war would mean nuclear holocaust. Therefore we must normalize relations with the Soviet Union, restore detente and negotiate mutual arms reduction. Cut the U.S. military budget by $100 billion and transfer the funds to domestic needs. End the blockade of Cuba. Independence for Puerto Rico.

2. Jobs For All. Stop Plant Closings

Enact the 6-hour day with no cut in pay, no speed-up or forced overtime. Federal takeover of closed factories under democratic trade union and community control. Convert these plants to useful production. An emergency government program to create new jobs. Raise unemployment compensation to 75% of prevailing wage.

3. A Labor Bill of Rights

Pass the Labor Reform Bill. Repeal Taft-Hartley and Landrum-Griffin Acts. End all restrictions on the right to organize and strike. Affirmative action programs at all levels of hiring, training and upgrading. Full rights for all foreign-born workers with or without documents.

People Before Profits

4. Defend Farm Workers and Family Farmers

Full civil and trade union rights for farm workers. Government guaranteed low-interest loans, free crop insurance and 100% parity prices for family farm operators. End trade restrictions and embargoes against socialist and developing countries.

5. Fight Racism, Defend Democratic Rights

Take emergency measures to enforce civil rights laws and genuine affirmative action programs in employment, housing, education, health care and political representation. Make racist acts a criminal offense. Outlaw the KKK and Nazis. Defeat S. 1722 — the repressive anti-labor federal criminal code bill. Outlaw the death penalty. Padlock the CIA and FBI. Guarantee equal access to the ballot and the mass media for independent candidates and political parties.

6. Raise Family Living Standards

End all taxes on first $25,000 of family income. Guarantee $15,000 minimum income for family of four. No evictions or forced repossessions. No shutoff of utilities for families unable to pay.

7. Full Equality for Women

Pass the Equal Rights Amendment. Equal pay for comparable work. Prosecute employers who discriminate in hiring and upgrading or who harass women on the job. Federally funded, comprehensive child care accessible to all. Safe, affordable family planning, and abortion. No involuntary sterilization. Full representation of women at all levels of government.

8. Fight for the Needs of Youth

Pass a National Youth Act to provide jobs, education and training, cultural and recreational opportunities for young people. No military registration, no draft. Free education through college. Unemployment compensation for first-job seekers.

9. Strengthen the Rights of Senior Citizens

Increase social security payments to meet inflationary living costs. No taxes on social security income. Free public transportation for seniors. Special aid on rent, utilities and mortgages for the needy. Reduce Medicare deductible to zero. Remove restrictions on seniors' jobs.

10. Health Care — A Human Right

Pass a National Health Act to provide free comprehensive quality health care for all as a basic human right. Public ownership of the health care industry. Stop hospital closings. Expand public health facilities. Strengthen and enforce the Occupational Safety and Health Act. (OSHA).

11. Clean The Environment

Force the monopolies to pay the costs to clean up our air, water and land. Strengthen and enforce anti-pollution standards. Full compensation to victims of pollution, at corporate expense.

12. Nationalize the Energy Industry

Put the oil monopolies and all energy production under public ownership. Stop price rip-offs. Federal support for alternative energy sources. Close all nuclear plants until independent scientist-consumer-trade union committees decide they are safe to operate.

GUS HALL
for President

ANGELA DAVIS
Vice President

THE TEAM FOR THE TIMES!
